DrugFAQs

Darvocet-N 100

Generic Name: acetaminophen & propoxyphene
Brand Names: Balacet, Darvocet A500, Darvocet-N 100, Darvocet-N50, Propacet 100, Wygesic

What is Darvocet-N 100?

Propoxyphene is in a group of drugs called narcotic pain relievers. Acetaminophen is a less potent pain reliever and a fever reducer that increases the effects of propoxyphene. The combination of acetaminophen and propoxyphene is used to relieve mild to moderate pain with or without fever. Acetaminophen and propoxyphene may also be used for other purposes not listed in this medication guide.

What is the most important information I should know about Darvocet-N 100?

Tell your doctor if you drink more than three alcoholic beverages per day or if you have ever had alcoholic liver disease (cirrhosis). You may not be able to take medication that contains acetaminophen. Propoxyphene may be habit-forming and should be used only by the person it was prescribed for. Keep the medication in a secure place where others cannot get to it. This medication can cause side effects that may impair your thinking or reactions. Be careful if you drive or do anything that requires you to be awake and alert. Tell your doctor if the medicine seems to stop working as well in relieving your pain.

What should I discuss with my healthcare provider before taking Darvocet-N 100?

Do not use this medication if you are allergic to acetaminophen (Tylenol) or propoxyphene. Propoxyphene may be habit-forming and should be used only by the person it was prescribed for. Acetaminophen and propoxyphene should never be given to another person, especially someone who has a history of drug abuse or addiction. Keep the medication in a secure place where others cannot get to it. Before using acetaminophen and propoxyphene, tell your doctor if you are allergic to any drugs, or if you have:

Copyright 2007 Gray C. Stahlman, MD All Rights Reserved www.drstahlmanonline.com
- asthma, COPD, sleep apnea, or other breathing disorders;
- liver or kidney disease;
- a history of head injury or brain tumor;
- low blood pressure;
- a stomach or intestinal disorder;
- curvature of the spine;
- mental illness; or
- a history of drug or alcohol addiction.

Tell your doctor if you drink more than three alcoholic beverages per day or if you have ever had alcoholic liver disease (cirrhosis). You may not be able to take medication that contains acetaminophen. FDA pregnancy category C. This medication may be harmful to an unborn baby, and could cause breathing problems or addiction/withdrawal symptoms in a newborn. Tell your doctor if you are pregnant or plan to become pregnant during treatment. Acetaminophen and propoxyphene can pass into breast milk and may harm a nursing baby. Do not use this medication without telling your doctor if you are breast-feeding a baby.

**How should I take Darvocet-N 100?**

Take this medication exactly as it was prescribed for you. Do not take it in larger amounts, or use it for longer than recommended by your doctor. Follow the directions on your prescription label. Tell your doctor if the medicine seems to stop working as well in relieving your pain. An overdose of acetaminophen can cause serious harm to your liver. The maximum amount of acetaminophen for adults is 1 gram (1000 mg) per dose and 4 grams (4000 mg) per day. One acetaminophen and propoxyphene tablet may contain up to 650 mg of acetaminophen. Know the amount of acetaminophen in the specific product you are taking. Take this medicine with a full glass of water. Take with food or milk to ease stomach upset. Drink 6 to 8 full glasses of water daily to help prevent constipation while you are taking acetaminophen and propoxyphene. Ask your doctor about ways to increase the fiber in your diet. Do not use a stool softener (laxative) without first asking your doctor. You may have withdrawal symptoms when you stop using acetaminophen and propoxyphene after using it over a long period of time. Do not stop using this medication suddenly without first
talking to your doctor. You may need to use less and less before you stop the medication completely. This medication can cause you to have unusual results with certain urine tests. Tell any doctor who treats you that you are using acetaminophen and propoxyphene. If you need to have any type of surgery, tell the surgeon ahead of time that you are using acetaminophen and propoxyphene. You may need to stop using the medicine for a short time. Store acetaminophen and propoxyphene at room temperature away from moisture and heat. Keep track of how many tablets have been used from each new bottle of this medicine. Propoxyphene is a drug of abuse and you should be aware if any person in the household is using this medicine improperly or without a prescription.

**What happens if I miss a dose?**

Since acetaminophen and propoxyphene is taken as needed, you may not be on a dosing schedule. If you are taking the medication regularly, take the missed dose as soon as you remember. If it is almost time for the next dose, skip the missed dose and wait until your next regularly scheduled dose. Do not use extra medicine to make up the missed dose.

**What happens if I overdose?**

Seek emergency medical attention if you think you have used too much of this medicine. An overdose of acetaminophen and propoxyphene can be fatal. Overdose symptoms may include extreme drowsiness, pinpoint pupils, nausea, vomiting, dark urine, jaundice (yellowing of the skin or eyes), confusion, fainting, weak pulse, seizure (convulsions), coma, blue lips, shallow breathing, or no breathing.

**What should I avoid while taking Darvocet-N 100?**

This medication can cause side effects that may impair your thinking or reactions. Be careful if you drive or do anything that requires you to be awake and alert. Do not use any other over-the-counter cough, cold, allergy, or pain medication without first asking your doctor or pharmacist. Acetaminophen is contained in many medicines available over the counter. If you take certain products together you may accidentally take too much acetaminophen. Read the label of any other medicine you are using to see if it contains acetaminophen. Avoid drinking alcohol while taking acetaminophen and propoxyphene. Alcohol may increase your risk of liver
damage while taking acetaminophen. Cold or allergy medicine, narcotic pain medicine, sleeping pills, muscle relaxers, antidepressants, or seizure medication can add to sleepiness caused by propoxyphene, or could slow your breathing. Tell your doctor if you need to use any of these other medicines together with acetaminophen and propoxyphene.

**Darvocet-N 100 side effects**

Get emergency medical help if you have any of these signs of an allergic reaction: hives; difficulty breathing; swelling of your face, lips, tongue, or throat. Call your doctor at once if you have any of these serious side effects:

- shallow breathing, slow heartbeat;
- feeling light-headed, fainting;
- confusion, unusual thoughts or behavior;
- seizure (convulsions); or
- nausea, stomach pain, loss of appetite, itching, dark urine, clay-colored stools, jaundice (yellowing of the skin or eyes).

Less serious side effects include:

- feeling dizzy or drowsy;
- mild nausea, vomiting, upset stomach, constipation;
- headache;
- blurred vision; or
- dry mouth.

This is not a complete list of side effects and others may occur. Tell your doctor about any unusual or bothersome side effect.

**What other drugs will affect Darvocet-N 100?**

Before taking this medication, tell your doctor if you are using any of the following drugs:

- aspirin or a blood thinner such as warfarin (Coumadin);
- carbamazepine (Carbatrol, Tegretol);
- glycopyrrolate (Robinul);
- mepenzolate (Cantil);
• atropine (Donnatal, and others), benztropine (Cogentin),
dimenhydrinate (Dramamine), methscopolamine (Pamine), or
scopolamine (Transderm-Scop);
• bladder or urinary medications such as darifenacin (Enablex),
flavoxate (Urispas), oxybutynin (Ditropan, Oxytrol), tolterodine
(Detrol), or solifenacin (Vesicare);
• a bronchodilator such as ipratropium (Atrovent) or tiotropium
(Spiriva); or
• irritable bowel medications such as dicyclomine (Bentyl),
hyoscyamine (Anaspaz, Cystospaz, Levsin, and others), or
propantheline (Pro-Banthine).

This list is not complete and there may be other drugs that can interact with
acetaminophen and propoxyphene. Tell your doctor about all the
prescription and over-the-counter medications you use. This includes
vitamins, minerals, herbal products, and drugs prescribed by other doctors.
Do not start using a new medication without telling your doctor.
